

Northwest Arkansas Metropolitan Fire Chiefs Association

CANDIDATE PHYSICAL ABILITY TEST Certification and Replacement Policy

When a candidate successfully completes the CPAT test they will receive certification indicating that they passed the CPAT test on a specific date. The CPAT certification serves as validation that the candidate participated in, and successfully completed, CPAT administered by agencies of the Northwest Arkansas Metropolitan Fire Chiefs Association, properly licensed by the IAFF.

In the event that technical issues prevent production of a certifying credential before the candidate departs the testing center, the credential will be produced and mailed to the candidate's registered address as soon as practical.

Upon issuance it is solely the candidate's responsibility to safeguard and store their certification in a secure location.

Certifications may be verified by contacting a representative of the Association at 479-751-4510.
